

Make some Glass Cabochon Magnets with this kit, compliments of the Becket Athenaeum!

Your kit contains:

- * 4 Glass Cabochons
- * 4 Round Magnets
- * 1 Bottle of Mod Podge Adhesive/Sealer
- * Multiple Pieces of Decorative Papers

Follow the instructions below to make your magnets. This kit contains several pieces of decorative paper, but you can also use magazine images, coloring pages, pressed flowers, photographs, your own artwork, fingerprints, or doodles.

1. Lay a glass bead over the piece of paper, trace around it with a pencil.

2. Cut out the paper inside the pencil lines.

3. Apply mod podge to the flat side of the bead.

4. Lay the patterned side of the paper down on the bead, let it dry.

5. Apply mod podge to the magnet and press it on to the paper.

6. Let it dry for 15 minutes and it is ready to go!

KEEP IT GREEN: If you have no need of the packaging materials from your kit, please return them to the library so that we can reuse them. Thank you!
